FEATURES & BENEFITS

- **Works with Windows 7**

Media presenter is now supported on Microsoft® Windows 7 and Vista.

- **Enhancements**

Media presenter now supports more video formats than ever before. You are also able to zoom in on videos, pause playback, playback from pause.

- **Not just for Court**

Media presenter can be used for all your presentation needs. It has been designed with professional presentations in mind, which can be used in wider markets such as meeting briefings and presentations to large or small audiences.

- **Excellent track record**

Every case that media presenter has been used, as resulted in a successful conviction.

- **Clip Editing**

With media presenter, clip creation and editing is easier, faster and more streamlined.

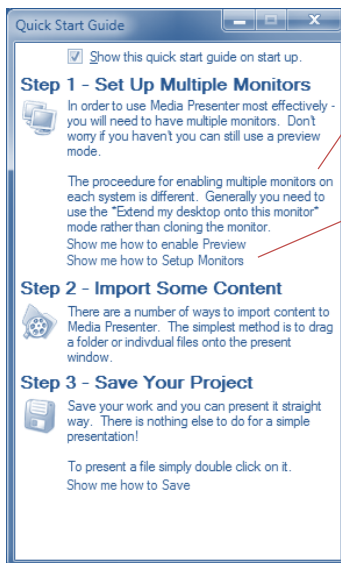

- **Time & Cost saving**

With media presenter, you are able to drop your files onto the interface, and present immediately. If you wish, you can link files together, edit clips, zoom as you play etc. All on-the-fly.

No need to return to your office to recreate your presentation.

External Screen auto setup

You no longer have the headache of having to worry about getting your external screens working and configured.

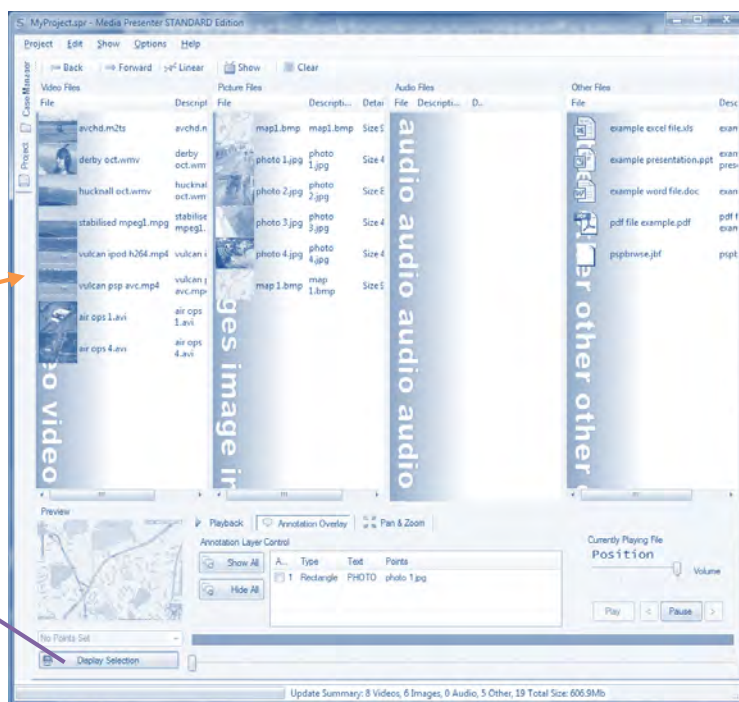

The procedure for enabling multiple monitors on each system is different. Generally you need to use the "Extend my desktop onto this monitor" mode rather than cloning the monitor.

ABOUT SCYRON

We have very quickly established ourselves as a world leader in intelligent security and surveillance. Underpinned by our patented technology platform, our suite of services and solutions provides relevant, proactive security solutions that are tailored to your exact requirements.

WHAT WE DO

Scyron provides a range of video management solutions for a global market that constantly needs to meet the challenges of processing video ranging from initial capture to presenting the processed video in court to secure convictions.

Our unique products allow our global customer base to meet their video management needs within the entire scope of the video management process:

TRANSMIT * CAPTURE * PROCESS * MANAGE * EXHIBIT

Our products are specifically designed and targeted to provide easy-2-use, powerful and feature-rich solutions. This simplifies each step to allow our customers to quickly and easily achieve excellent results. This also allows our customers to concentrate on their core role within their business by not having to become computer experts in order to achieve expert results.

We also provide intelligent security, surveillance, hardware and consultancy service solutions, underpinned by our patented technology platform; we provide relevant, proactive solutions that are tailored to customer's exact requirements.

Video will pass through a number of stages that may involve conversion to windows format video, automated analysis of lengthy video footage, masking out objects before arriving at the storage, management and presentation stage. Scyron is able to offer products at every stage or a combination to provide an end-to-end solution.

Scyron continues to engage very closely with our customers and markets to maintain our tailor-made approach to our solutions.
